

Dinero-qt Simple Guide (For Non-Technical Users)

This guide is for the **newest Dinero-qt**.

Important: In this version, the **daemon and miner are embedded in the app. You do not need separate daemon/miner setup.**

1. Open Dinero-qt and Start It

- Open `Dinero-qt`.
- Click **Start Daemon**.
- Wait until status shows connected.

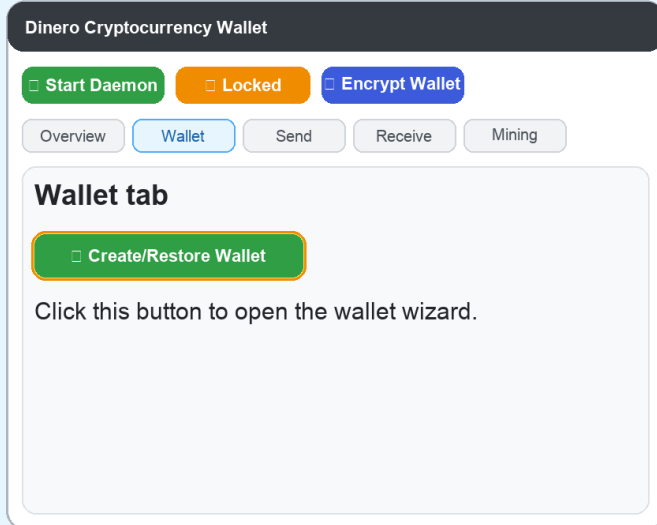

2. Create Your Wallet

- Open the **Wallet** tab.
- Click **Create/Restore Wallet**.
- Choose **Create a new wallet**.

Create Wallet

- Open the Wallet tab.
- Click Create/Restore Wallet.
- Choose Create a new wallet.

3. Save Your 12 Secret Words

- In wallet setup, hold ****HOLD to Reveal Seed****.
- Write all ****12 words**** on paper, in the exact order.
- Store this paper in a safe place.

Never do this:

- No screenshots
- No cloud notes
- No sending it to anyone

Save 12 Words

- Hold to reveal the seed phrase.
- Write all 12 words on paper.
- Keep paper offline and private.

Confirm password

5. Unlock Only When Needed

- Your wallet should stay locked most of the time.
- Click the lock button to unlock when you need actions like sending or using wallet address in mining.
- Lock again after use.

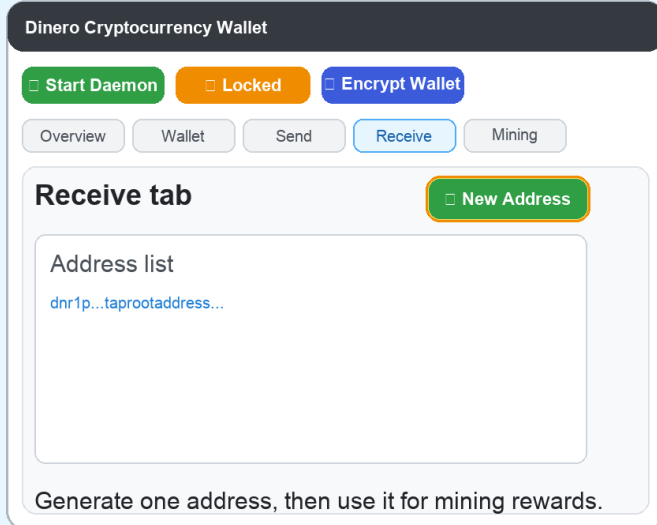

6. Generate a Receiving Address

- Open the **Receive** tab.
- Click **New Address**.
- This address is where mining rewards go.

Get Address

- Open Receive tab.
- Click New Address.
- Use this Taproot address for rewards.

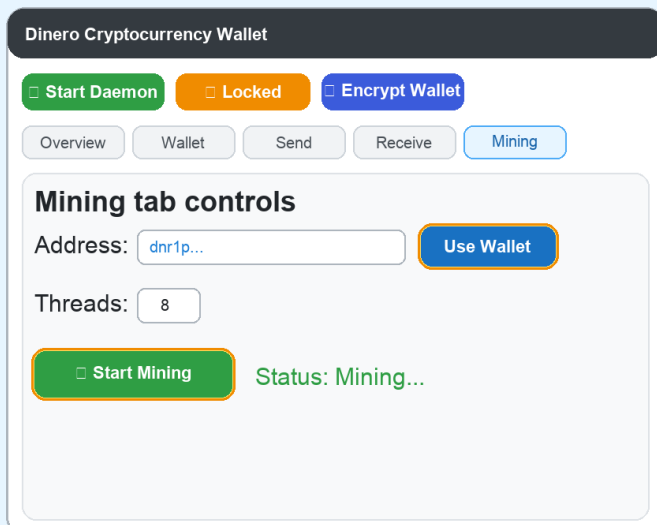

7. Start Mining (Embedded Miner)

- Open the **Mining** tab.
- Click **Use Wallet** (fills your mining address).
- Keep default threads (or set your own).
- Click **Start Mining**.

Start Mining

- Open Mining tab.
- Click Use Wallet.
- Set threads and click Start Mining.

8. Stop Mining and Check Rewards

- Click ****Stop Mining**** when you want to stop.
- Open ****Wallet**** tab to watch balances.
- New mining rewards appear first as immature, then become spendable after confirmations.

Dinero-qt Beginner Guide | Step 8

Stop & Check Rewards

- Click Stop Mining when done.
- Check Wallet balance.
- Wait for 100 confirmations.

Stop + rewards

☐ Stop Mining

Mined coins appear in wallet as "Immature" first.
After 100 confirmations they become spendable.

☐ Balance
Confirmed: 0.00 Immature: 100.00

Quick Help

- `Start Mining` button is disabled:
 - Click ****Start Daemon**** and wait for connection.
- `Use Wallet` is disabled:
 - Unlock wallet first.
- No spendable reward yet:
 - Wait for required confirmations.

Security Checklist

- I wrote down my 12 words on paper.
- I stored the paper in a safe location.
- I set a strong password.
- I never shared seed words with anyone.
